FRAP ROSSO

Sharper in every corner.
Performance arms, axle kits and adjustable links.

STREET

TRACK

PRO-DRIFT

 MADE IN ITALY

— WHY ROSSO

SHARPER IN EVERY CORNER.

Your car was built to be quiet first. FRAP Rosso makes it precise.

Factory suspension is a compromise. Soft rubber bushings keep vibration out of the cabin, but under hard braking and fast cornering they give way. The wheels move a few millimetres, the alignment shifts and the steering goes vague, just when you need it most.

FRAP Rosso takes the compromise out. Stiffer bushings and stronger arms hold each wheel where the engineers meant it to be. The car turns in sooner, stays flatter and tells you more through the steering wheel.

Every Rosso part bolts on like the original. No cutting, no modifications and no guesswork for the workshop, so the upgrade fits into a normal service.

Rosso parts come from FRAP in Turin, the factory that makes OE suspension arms for Italian sports cars. Same engineers, same test rigs, same standard. Tuned for drivers who notice the difference.

— SHARPER TURN-IN

Less flex in the bushings means the car answers the wheel straight away.

— STABLE UNDER BRAKING

The geometry stays put when the load moves forward.

— BOLTS ON LIKE OE

Direct fit, original mounting points, no modifications.

STREET TO CIRCUIT.

One idea, three levels of commitment. Choose the line that matches how the car is driven.

AVAILABLE NOW

ROSSO STREET

For fast road cars and daily drivers

More feel and precision you can live with every day. Stiffer arms and stronger bushings, with a comfort level that still suits the road.

- 95 control arms, ball joints and bushings
- 6 complete axle kits, one order number each
- Adjustable stabiliser links in 8 lengths

IN DEVELOPMENT

ROSSO TRACK

For track days and club racing

Uniball joints and polyurethane bushings that hold the geometry at the limit, lap after lap.

- First applications: Toyota GR86 and Honda Civic Type R
- Developed and tested on FRAP's own rigs

IN DEVELOPMENT

ROSSO PRO-DRIFT

For drift cars and competition

More steering lock and adjustable geometry, built to take the abuse of competition driving.

- Extended steering angle
- Adjustable camber and toe

Rosso Track and Pro-Drift specifications are being finalised. Ask your EXEDY partner for launch dates.

THE DIFFERENCE IS IN THE BUSHING.

The arm connects the wheel to the car. The bushing decides how much the wheel is allowed to move.

ORIGINAL

Voids in the rubber: two small pads carry the load

TWO SMALL PADS TAKE THE LOAD

They flex, wear and start to knock. The wheel moves under braking and the alignment drifts.

FRAP ROSSO

Full bushing: the load is spread all round

A FULL BUSHING SPREADS IT

Less flex, less wear, less noise. The wheel stays where the geometry puts it.

POM BEARING SHELL

On the upper arms F2427FR and F2428FR for Alfa Romeo 147, 156 and GT, FRAP replaces the standard plastic bearing with a POM shell. It reduces early wear and noise, a known weak point of the original part.

— OE PEDIGREE

FROM THE SAME FACTORY FLOOR.

FRAP makes the suspension arms for the Maserati MC20 and the Alpine A110, and arms and ball joints for other European sports cars.

FRAP Rosso parts are designed, assembled and tested in the same Turin factory, under the same IATF 16949 quality system. Making steering and suspension parts since 1932, FRAP knows what a road car needs and what a sports car demands.

150_{kN} Test rig load, on 3 axes at once	10_{Hz} Fatigue cycles, potholes and articulation simulated	500_{h+} Neutral salt spray test
100_% Crack check on ball studs	CMM Dimensional checks against the drawing	IATF 16949 quality system, the same as FRAP's OE production

ONE PACKAGE. ONE ORDER NUMBER.

Everything to rebuild the front axle in one package: arms, links, tie rod ends and hardware. The workshop orders once and fits a matched set.

EIGHT LENGTHS. OVER 1,300 CARS.

Lowered or raised, the anti-roll bar has to sit level to do its job. Rosso adjustable links set the right length, so the bar works without preload.

PART NO.	THREAD	MIN (MM)	MAX (MM)	RANGE (MM)
FAFR10-100-135	M10	100	135	35
FAFR10-144-182	M10	144	182	38

HOW TO ORDER AND FIT

01

FIND THE CAR

Look up model and year in this index, or search online at exedyfrap.com.

02

CHECK THE PART

Compare position, photo and OE number. The QR code on every box opens the part's page.

03

ORDER

Order through your EXEDY partner. Prices and stock on request.

SAME NUMBER, PLUS FR

Every Rosso part shares its number with the standard FRAP part for the same position, plus FR: F1735 becomes F1735FR. Same fitment, same mounting points.

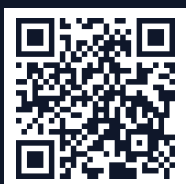

TIGHTEN AT RIDE HEIGHT

Torque bushing bolts with the car on its wheels, replace in pairs and set the alignment after fitting.

EXEDY FRAP

ITALIAN ENGINEERING. JAPANESE REACH.
